

The figure is a 2D heatmap representing the spatial distribution of TOT values for the 130 GeV dataset. The x-axis is labeled 'X Pixel' and ranges from 194 to 208. The y-axis is labeled 'Y Pixel' and ranges from 27.5 to 47.5. A color bar on the right side of the plot indicates the TOT values, ranging from 0 (dark purple) to 350 (yellow). The distribution is centered around (200, 40) with a peak value of approximately 350. The plot shows a complex pattern of values, with higher concentrations in the central region and lower values towards the edges.
